From 3D-printed motorcycle to designer table:

Meet the EUROPEAN ALUMINIUM AWARD 2016 nominees

Award to be presented at ALUMINIUM 2016 on 29 November

Lightweight, powerful and aesthetically pleasing – engineers, designers and architects consider

aluminium the material that helps them create innovations and emphasise the features they care about. Want proof? Look no further than the EUROPEAN ALUMINIUM AWARD, the aluminium industry’s biennial award honouring the most creative and unusual new developments. Out of 52 innovative products from 18 countries submitted this year, 19 were nominated. The award will be presented on 29 November at ALUMINIUM 2016, the world’s largest industry trade fair taking place in Düsseldorf.

Nominated products range from a body for an electric vehicle to a 3D-printed motorcycle, and from a wind-protection wall for offshore oil rigs to a high-tech building façade designed by star architect Zaha Hadid. What they all have in common is that they integrate aluminium in a new and innovative way.

The award is presented in these categories: Automotive, Architecture & Construction, Design & Lifestyle, Production Techniques, Tools & Machinery and Transportation. The additional Young Talents Award recognises young designers and engineers.

Throughout the trade fair, ALUMINIUM visitors will be able to examine the nominated products at the Award Pavilion in Hall 10. An independent jury of international experts from Germany, the UK, Italy, the Netherlands and Denmark headed by Prof. Laurens Katgerman (Delft Technical University) and Vito Oražem (Design Zentrum Nordrhein Westfalen) will select the best entries. The winner of the Design & Lifestyle award will be chosen through online voting by the visitors of the ALUMINIUM trade fair.

The award ceremony, which will take place at the ALUMINIUM Forum in Hall 11, is scheduled to start at 4 pm on 29 November.

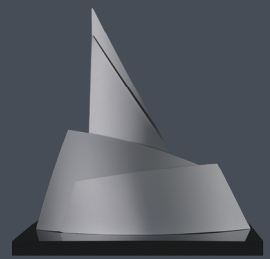

The Aluminium Award is an initiative of the Dutch Aluminium Centre in Co-operation with the European Aluminium Association (EAA), Gesamtverband der Aluminiumindustrie (GDA) and ALUMINIUM International Trade Fair & Conference.

The nominees

“Architecture & Constructions” category – 6 nominations

- BARCO ONE CAMPUS – Atrium Walls (AVC, Belgium)
- Aluminium Windwall (Bayards Aluminium Constructions, Netherlands)
- Residence Blanco Oostduinkerke (BURO II & ARCHI+I, Belgium)
- Port House Antwerp (GrovenPlus, Belgium)
- L'Orangerie (Seraing, Belgium / Novelis, Switzerland)
- Façade P+R Garage Trainstation Elst, NL (Van Campen Industries, Netherlands)

“Automotive” category – 3 nominations

- Surfalex (Constellium, France)
- All-Al light eBody (Hydro Rolled Products, Germany)
- REALCAR (Jaguar | Land Rover & NOVELIS, UK / Switzerland)

“Design & Lifestyle” category – 3 nominations

- Solar Fingerplate (Austria Druckguss, Austria)
- ATTACH table-system (Grumdesign & Lammhults, Denmark / Sweden)
- ViaLuce (Project 21c / SAPA Extrusions Raeren, Belgium)

“Production Techniques, Tools & Machinery” category – 3 nominations

- ALUMASTER High Speed Disc (August Rüggeberg, Germany)
- Carbon-reinforced Aluminium Spindle (HP & Engineering Community, Spain)
- NANOmel® Technology (SiOx, Denmark)

“Transportation” category – 2 nominations

- One Pallet Stacking System (SpaceInvader, Denmark)
- High Pressure Die Casting Aluminum Suspension Cross Beam (Streparava, Italy)

“Young Talents” category – 2 nominations

- Light Rider 3D-printed motorcycle (Niels Grafen TU München / Airbus APWorks, Germany)
- Solar Fingerplate (Philipp Griesacker / Austria Druckguss, Austria)

About the EUROPEAN ALUMINIUM AWARD

The EUROPEAN ALUMINIUM AWARD is an initiative by the Dutch Aluminium Centrum in cooperation with the industry association European Aluminium, the German Aluminium Association (GDA) and ALUMINIUM 2016. Altogether, 17 European aluminium associations support the competition. The trade magazines Aluminium International Today and Aluminium Kurier serve as media partners.
